VALUATION METHODOLOGY

How was the valuation determined?

CLAIM INSPECTION

GEICO has provided CCC with the zip code where the loss vehicle is garaged, loss vehicle VIN, mileage, equipment, as well as loss vehicle condition, which is used to assist in determining the value of the loss vehicle.

DATABASE REVIEW

CCC maintains an extensive database of vehicles that currently are or recently were available for sale in the U.S. This database includes vehicles that CCC employees have physically inspected, as well as vehicles advertised for sale by dealerships or private parties. All of these sources are updated regularly.

SEARCH FOR COMPARABLES

When a valuation is created the database is searched and comparable vehicles in the area are selected. The zip code where the loss vehicle is garaged determines the starting point for the search. Comparable vehicles are similar to the loss vehicle based on relevant factors.

CALCULATE BASE VEHICLE VALUE

Adjustments to the price of the selected comparable vehicles are made to reflect differences in vehicle attributes, including mileage and options. Dollar adjustments are based upon market research.

Finally, the Base Vehicle Value is the weighted average of the adjusted values of the comparable vehicles based on the following factors:

- Source of the data (such as inspected versus advertised)
- · Similarity (such as equipment, mileage, and year)
- Proximity to the loss vehicle's primary garage location
- Recency of information

Vehicles sold in the United States are required to have a manufacturer assigned Vehicle Identification Number(VIN). This number provides certain specifications of the vehicle.

Please review the information in the Vehicle Information Section to confirm the reported mileage and to verify that the information accurately reflects the options, additional equipment or other aspects of the loss vehicle that may impact the value.

Allowances are factors influencing the value of the loss vehicle when compared to a typical vehicle. The typical vehicle is a vehicle of the same year, make, and model as the loss vehicle, including average mileage, and all standard equipment. These allowances are displayed for illustrative purposes only.

The Base Vehicle Value is calculated from the comparable vehicles with adjustments to reflect the loss vehicle configuration
